KÖSTER Façade Cleaning Cream

Technical Data Sheet P 110 005

Issued: 2019-09-06

Cleaning agent for mineral surfaces

Features
KÖSTER Façade Cleaning Cream is a liquid, pasty Façade Cleaning Cream. It removes scaling and efflorescence from mineral substrates. It also cleans many other materials and surfaces quickly and effectively. KÖSTER Façade Cleaning Cream is made from natural, renewable raw materials. Due to its creamy consistency the material covers the surface excellently and doesn't drip. The long contact time helps to dissolve tough stains and soiling.

Technical Data

Active ingredient	washing active acid
Viscosity	approx. 2000 - 3000 mPa.s (creamy consistency)
Contact time	approx. 5 - 10 minutes

Fields of Application
KÖSTER Façade Cleaning Cream is suited for Façades, clinker, paving stones, and natural stone. KÖSTER Façade Cleaning Cream is not suitable for acid sensitive surfaces like Marble, calcareous sandstone, lime sand brick, and certain types of tile.
KÖSTER Façade Cleaning Cream can lighten the substrate. A test area should always be applied in an inconspicuous area to test for changes in shade.

Application
Apply KÖSTER Façade Cleaning Cream undiluted with a soft brush or roller onto the substrate. Test the right dosage and contact time in an inconspicuous area. Typical contact time is between 5 and 10 minutes. The material should not be allowed to dry onto the surface. Keep the surface moist. Dried KÖSTER Façade Cleaning Cream can be re-activated with a wet scrubbing brush. After the contact time brush off the surface with a coarse scrubbing brush with ample amounts of water, or with a pressure washer until all residues are removed.

Consumption
Approximately 100 - 250 g/m^2 depending on the substrate.
We recommend coating a test area with the material prior to the main application in order to determine the consumption, contact time and the effect of the product.

Cleaning
Clean tools after use with water.

Packaging

P 110 005	5 kg bucket

Storage
Store cool and frost free. KÖSTER Façade Cleaning Cream can be stored for a minimun of 2 years.

Safety
Wear acid resistant protective gloves and goggles when processing the material. Observe all governmental, state, and local safety regulations when processing the material.

Note:
Surfaces sensitive to acids such as glass, window frames and doors should be protected from contact with KÖSTER Façade Cleaning Cream. The rinse water should be collected separately and neutralized with lime.

The information contained in this technical data sheet is based on the results of our research and on our practical experience in the field. All given test data are average values which have been obtained under defined conditions. The proper and thereby effective and successful application of our products is not subject to our control. The installer is responsible for the correct application under consideration of the specific conditions of the construction site and for the final results of the construction process. This may require adjustments to the recommendations given here for standard cases. Specifications made by our employees or representatives which exceed the specifications contained in this technical guideline require written confirmation. The valid standards for testing and installation, technical guidelines, and acknowledged rules of technology have to be adhered to at all times. The warranty can and is therefore only applied to the quality of our products within the scope of our terms and conditions, not however, for their effective and successful application. This guideline has been technically revised; all previous versions are invalid.
